CD-ROM Patent Images by Technology

The U.S. Patent and Trademark Office announces the implementation of a demonstration project to provide classified sets of patent images in CD-ROM format. The classified sets are collections of U.S. patents which, by virtue of their placement in the U.S. Patent Classification System, represent meaningful technological groupings.

The two classified sets selected for this project are: Genetic Engineering, as defined by Class 935 and Class 435, subclass 172.3; and Acid Rain, as defined by Class 55, subclass 73 and Class 423, subclasses 220-234 and 242-244.

The sets will contain:

1) current classification information
2) full images for all patents in the set, and
3) full text for those patents in the set where the text is available in electronic format, i.e., since 1971

All available text and classification information will be indexed and searchable, thus allowing all patents in the set to be retrieved by their associated classification information, and/or by words in the text. Images of all patents in the set will be stored in numeric sequence on the discs and may be located on a disc other than the disc where the text and indexes are stored. Images may be retrieved by patent number after loading the appropriate image disc.

It is anticipated that the demonstration CD-ROM sets will be available July 1992. Each set will consist of approximately three discs. They are available for order now by the public for $150 per set. This price represents the marginal cost to the U.S. Patent and Trademark Office to produce and distribute these discs based upon the volume of orders anticipated.

Purchasers will be invited to participate in a voluntary survey to be conducted in October 1992 to assess the usefulness of this demonstration product.

Reference Collections of U.S. Patents and Trademarks Available for Public Use in Patent and Trademark Depository Libraries

The following libraries, designated as Patent and Trademark Depository Libraries (PTDLs), receive patent and trademark information in various formats from the U.S. Patent and Trademark Office. Many PTDLs have on file all full-text patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PDTLs have both the patent and trademark sections of the *Official Gazette of the U. S. Patent and Trademark Office*. The full-text utility and design patents are distributed numerically on 16 mm microfilm, and plant patents on color microfiche. Patent and trademark search systems on CD-ROM (Compact Disc-Read Only) format are available at all PTDLs to increase utilization of and enhance access to the information found in patents and trademarks. It is through the CD-ROM systems that prelminary patent and trademark searches can be conducted through the numerically arranged collections.

All information is available for use by the public free of charge.

In addition, each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as well as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials. Facilities for making paper copies of patent and trademark information are generally provided for a fee.

Since there are variations in the scope of patent and trademark collections among the PTDLs, and their hours of service to the public vary, anyone contemplating use of these collections at a particlular library is urged to contact that library in advance about its collections, services and hours in order to avert possible inconvience.

The following marks are published in compliance with section 12(a) of the Trademark Act of 1946. Applications for the registration of marks in more than one class have been filed as provided in section 30 of said act as amended by Public Law 772, 87th Congress, approved Oct. 9, 1962, 76 Stat. 769. Opposition under section 13 may be filed within thirty days of the date of this publication. See rules 2.101 to 2.105.

A separate fee of two hundred dollars for opposing each mark in each class must accompany the opposition.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
